

This piece of legislation is just one more law against consumers.

We are sick of being treated by the MPAA/RIAA as criminals.

Why is it that they have any rights over what I may record in my home ?

Why are you passing laws that eliminates my rights as governed by the Home Recording Act ?

Why are their profits more important that MY RIGHTS ?

These companies are doing one thing, ensuring the death of HDTV because I know that many like myself will not purchase any sort of hardware that limits my rights to record shows off the airwaves or cable. If my TV dies, then I will purchase a monitor only and use my computer TV tuner card to watch what few TV shows I do watch.

Please vote against this "profits protection" flag as it is extremely anti consumer (the people you are SUPPOSED to be protecting)
